Introduction:

The Federal Authority for Government Human Resources seeks to develop an integrated development system that improve the performance of human resources in the Federal Authorities in a manner that reflects positively on the levels of institutional performance. Based on the responsibilities of the Authority that set out in the Federal Decree Law No. (11) of 2008 on Government Human Resources, as amended and its executive regulations, the decision of the Cabinet No. (11) of 2012 on the training and development system for federal government employees, and the decision of the Cabinet No. (12) of 2012 on the performance management system for federal government employees. This resulted in a set of regulations, which facilitates the work of the human resources departments in the Federal Authorities, such as the performance management system for evaluating and developing the performance of the employees, the training and development system seeking an effective training based on adapting the training to the actual needs of the employees, in addition to the competency framework developed at the federal level that seeks to identify an accurate definition of the form of the functional performance of the employees in the Federal Authorities, and to be a point of comparison between their actual performance and targeted performance that determines the performance gap in their performance.

The performance management system is linked to the behavioral competencies framework, where the employees' performance evaluation is based on the extent of their behavioral competencies, and a close link must be established between them and the training and development system. Therefore, the Federal Authority for Government Human Resources has a detailed study of training to be built on the behavioral competencies, facilitating the process of developing the skills and competencies required by the employees in the federal government to ensure that all training programs contribute to improving the overall performance of the employees, and that those programs provided by the preferred training partners of the Federal Authority for Government Human Resources within the "Maaref" Initiative is achieving its objectives, which is reflected on the quality of training and raise the compliance with policies and regulations of the Authority and Government Federal Authorities.

Based on the aforementioned, the Authority has developed this manual of training based on behavioral competencies depending on the best practices in this field in order to reduce the gap between the actual performance and the targeted performance of the employees (which the performance management system helps to define), by selecting training programs for employees and to identify the skills, capabilities and knowledge they should acquire after comparing them to the level of their behavioral competencies specified in the performance management system. Based on the results of this comparison, we identify the appropriate training programs to them to improve the level of mastering these competencies in accordance with the instructions and procedures of the Federal Training and Development System. This process shall be performed in such a way as to ensure that the training and development system is structured so that their training is built on these competencies in a specific and clear manner. This will

contribute to the provision of appropriate training that results from a training need that has been determined based on the results of the employee performance evaluation, as an output of the performance management system associated to behavioral competencies.

This manual strengthens the regulations and policies of the Authority aimed at achieving the best performance rates, and strengthens the government's efforts to improve individual and institutional performance in the Federal Authorities, implementing the best practices leading to enhancing the investment of available resources and achieving the targeted results from enhanced training for the productivity of the employees. It is an institutional activity based on upgrading the cognitive, skill and behavioral capacities of employees to achieve institutional objectives more efficiently and efficiently at different individual, collective and institutional levels.

This manual is directly targeted the human resources departments in the Federal Authorities, which is the main body to implement what is included in the training and development system, and spread it on the employees. Therefore, it targeted the employees and their direct managers who are responsible for the application of the components of the manual and analyzing their training needs based on grades of their behavioral competencies that appear in the results of the performance management process.

First Chapter

General Framework

First: Definitions

In the application of the provisions of this Manual, the following words and expressions shall have the meanings indicated below, unless the context otherwise requires:

Federal Authorities: Ministries, public bodies and institutions and organs of the federal government subject to the provisions of the law.

Law: Federal Decree Law No. (11) of 2008 on Human Resources in the Federal Government, as amended.

Authority: Federal Authority for Government Human Resources.

Senior Management: Undersecretary of the Ministry, Assistant Undersecretary and the like.

Human Resources Department: The administrative department concerned with human resources in the Federal Authority.

Organizational Unit: The administrative unit followed by the job position in the organizational structure in the federal authority.

Function: A set of tasks and duties specified by the Competent Authority for clarifying the special roles that the job include within the organization in accordance with the provisions of the law.

Job Title: A name that refers to a specific role in a job that has been evaluated at a certain level in the organization's organizational structure.

Performance Management System: The system for evaluating the performance of federal government employees that approved by the Council of Ministers Decision No. (2/2/20 of 2012).

Individual Development Plan (I.D.P): Individual Development Plan is an action plan developed in a manner appropriate to the function of the person concerned to develop specific competencies (knowledge, technical, leadership or basic behavioral competencies) that would improve his/her performance in his/her current job or to prepare him for other future responsibilities.

Behavioral Competency Framework: A general framework that includes the skills (leadership or basic) that are measurable, which must be met by federal government employees.

Skill Level: A level describes the degree of gradient complexity and the importance of behavioral indicators at each level so that their level of difficulty and importance increases as the functional grade increases.

Behavioral Indicators: These indicators provide information and details on the specific behaviors of each competency at each level, with examples of how this efficiency is developed, tested and applied, and the behavioral indicators at each level of efficiency are illustrative, which means that other similar patterns if behaviors are also acceptable.

Training: Training has several types and forms. For making use of the manual, training here means theoretical or applied training carried out in designated places in the presence of a trainer.

Training and Development System: The system for training and development of federal government employees, which is approved under the Council of Ministers Decision (11) of 2012.

Training Programs: A training unit that includes a specific learning curriculum within specific training hours in order to provide employees with the necessary knowledge, skills and competencies according to a pre-approved training plan.

Maaref for Preferred Training Partners: Maaref initiative of the Preferred Training Partners in the Federal Government' selects the best training providers in the UAE according to professional standards, and classify them as preferred federal government training partners linked to the federal government agencies in order to benefit from their services and training programs at competitive and free prices and offers.

Preferred Training Partners: Training providers limited and selected by the Federal Authority for Government Human Resources within the "Maaref" initiative.

Second: The General Framework of Behavioral Competencies

The general framework of behavioral competencies is deemed the mainstay of various systems, including the performance management system and other systems related to it, such as the training and development system of federal government employees, the job succession system, and description and classification system.

The objective of this framework is to give the direct managers and employees a holistic understanding of the concept of competencies and the mechanism of its usage. It also helps employees to understand, develop and acquire the basic and leadership skills, abilities and behaviors that help them to perform their functions effectively, manage their professional progress and employ their full potential, as this system indicates the required competencies from the employees, regardless of their functional levels.

The behavioral competencies framework defines as "a general framework that includes some of the skills (leadership or basic) that are subject to evaluation and which must be met by the employees of the ministries and Federal Authorities." This definition shows that the competency framework includes a range of skills, fields of knowledge and

behaviors to be met by the employees that help them to perform their functions distinctly, where the indicators of the competencies describe the behaviors required to be met by the employee, which include, for example, but not limited to, the possibility of the existence of other indicators that have not been addressed but they are acceptable in this regard. Behavioral competencies are divided into two parts, are:

Leadership Competencies

Leadership competencies are among the main competencies for roles and positions within leadership and higher positions, which have been prepared in line with strategic thinking, strategic directions and the development of federal leadership. Leadership competencies consist of three types:

- Strategic thinking.
- Empowering employees and developing their capabilities.
- Leadership Change.

Basic Competencies

The basic competencies include the general competencies that are required to be met by the federal government employees in the 10th grade and above so that the Federal Authority can achieve its objectives and vision. They were prepared in the light of Emirates' strategic vision, the UAE Government's strategic plan and the Professional Code of Conduct.

- Accountability.
- Managing resources effectively.
- Focusing on results.
- Focusing on customer service.
- Communication and Communication Skills.
- Working in a team.

"To find out more about the behavioral competencies and their respective characteristics, please review the general framework of behavioral competencies in the Federal Government of the UAE available on the website of the Federal Authority for Government Human Resources

Third: Scope of Application

This manual applies to all posts in all grades in Federal Authorities that subject to the provisions of the law. It is used as a non-binding guideline by the federal authorities.

Fourth: Objectives and Responsibilities

Objectives

Designing the training based on the behavioral competencies identified in the general framework of behavioral competencies in the federal government of the UAE that based on enhancing the ability of employees to achieve the required performance.

Employing behavioral competencies as a basis for implementing and simplifying training needs analysis, leading to greater accuracy in meeting the training needs of employees and institutions in the federal government.

Employing behavioral competencies as standard criteria for determining the cognitive and behavioral objectives of the training courses, reflecting the accuracy and credibility of the evaluation of the training outcomes of these courses.

Employing behavioral competencies as an input used by the Federal Authorities to train their employees to fill current and future vacant positions by providing the necessary training for the targeted employees.

Responsibilities of the Federal Authority for Government Human Resources

The functions of the Authority are represented as follows: "The training and development system of the employees of the federal government", in addition to the following:

- Selecting and including training programs in this manual and linking them to the competent competencies according to the appropriations issued by the National Qualifications Authority.
- Updating the training matrix database based on behavioral competencies.
- Monitoring the impact of training on the development of competencies and skills, and measuring the return on training that implemented by the Federal Authorities and training providers.
- Updating the standards and criteria of selecting training providers by the Federal Authorities in order to ensure the highest standards of training.
- Updating the standards and criteria of the training programs provided by the training providers by the Federal Authorities in order to ensure the highest quality standards of training that achieved these objectives.

Responsibilities of senior management in Federal Authorities

The responsibilities of the senior management are all those indicated in the "Training and Development System for Federal Government Employees", in addition to the following:

- General supervision of the application of the manual in the Federal Authority.
- Ensuring that the competency-based training plan conforms to the strategic plan of the Federal Authority.

Responsibilities of human resource departments and / or departments concerned with training

The responsibilities of human resources departments and / or departments concerned with training are as described in the "Training and Development System for Federal Government Employees", in addition to the following:

- Explaining the training manual that based on behavioral competencies in the federal government to the departments and employees in the Federal Authority.
- Coordinating with the training providers in Maaref or role of the specialization attested to implement the training programs indicated in the manual.
- Ensuring the compliance of direct managers with the manual when selecting the training programs for employees.
- Ensuring that direct manager are directing their employees to update individual development plans (I.D.P) based on the inputs of the manual in coordination with their direct managers.

Responsibilities of Direct Managers

The responsibilities of the direct manager are all those indicated in the "Training and Development System for Federal Government Employees", in addition to the following:

- Raising the awareness of the employees on the directions of the manual for training based on behavioral competencies.
- Participation of employees in identifying their training needs and updating their individual development plans (I.D.P)
- Identifying the training programs for employees based on the results of their performance evaluation and the desire to develop the business, taking into account the behavioral competencies to be developed.

Responsibilities of the Employees

The responsibilities of the employees are as indicated in the "Training and Development System for Federal Government Employees", in addition to the following:

- Proper understanding of the competency-based training manual adopted by the Federal Government.
- Selecting the most suitable training programs to develop competencies and skills based on the results of their performance evaluation in relation to their specific competencies.
- Identifying their training needs in collaboration with their direct managers on the basis of competency-based training, and updating their individual development plans.

Responsibilities of Training Institutes and Centers

The responsibilities of training institutes and centers are as follows:

- Adopting training programs from the National Qualifications Authority.

- Updating the list of training programs approved by the National Qualifications Authority, and including them in the manual in coordination with the Federal Authority for Government Human Resources.
- Proposing and classifying new training programs according to the competencies adopted in the federal government and the performance management system of the employees, in coordination with the Federal Authority for Government Human Resources.
- Following-up the commitment of trainers and trainees in training programs by directing their contents with targeted behavioral competencies.
- Designing training tests (fulltime and remote), taking into account the targeted behavioral competencies, and taking them into account when measuring the training impact.

Responsibilities of the National Qualifications Authority

The responsibilities of the Authority are as follows:

- Ensuring that the preferred training partners within the Maaref initiative are properly obtained the required license and approvals.
- Indicating the extent to which the content of the general and specialized training programs provided by the training partners within "Maaref" initiative conforms to the criteria determined by the National Qualifications Authority.
- Determining the equivalent of each training program of accredited training hours.
- Adopting and equating professional and specialized certificates issued by training partners to federal government employees.
- Providing the Federal Authority for Government Human Resources with the lists of training partners who have been approved periodically.

Second Chapter

Application phases of the Manual at the level of the Federal Authority

Selection Phases of Training Programs according to Competency

The training manual based on behavioral competencies consists of several phases, all of which are integrated with the training and development system phases, enforcing its terms and conditions. Hereinafter the five phases necessary to apply the training manual based on behavioral competencies, as explained below.

Phase I: Identifying the Performance Gap

The main objective of the training is to fill the gaps in the level of efficiency that the employee actually has and the level of efficiency required for the job. These gaps are shown through the results of the performance management system that show the level of the performance gap and the deficiencies in the employee's performance.

Phase II: Competency Selection

After identifying the shortcomings of the performance, the employee shall, in collaboration with the direct manager, and with the help of human resources department, identify the competencies that must be developed based on the results of the evaluation of the employee in the performance management system to meet the deficiencies in the performance of that employee, according to the general framework of behavioral competencies in the federal government.

Phase III: Identifying the Targeted Training

In determining the shortcomings of performance, indicating the behavioral competencies to be developed to fill that gap, the identification of skill level to be developed should begin to improve the level of competence of the employee. Based on the level of skill, the amount and type of training intervention required will be determined to enable the employee to achieve the expected performance and filling the gap in performance.

Phase IV: Selection of Training Programs

In determining the amount and type of training necessary for the employee to develop his or her skills to enhance his or her ability to fill gaps in performance and to exercise the defined competencies effectively, the related training programs are reviewed and the most appropriate programs are identified to match the actual needs of the employee in order to select the programs achieving these objectives, taking into account the capabilities of training providers and the quality of these training programs, the amount of specialization and the certified professional certificates, taking into consideration when selecting them that the training providers shall fulfill and achieve the following criteria:

- The training programs provided by accredited training providers within the Maaref Initiative are approved only, which include all the required data, such as

objectives, subjects, conditions, evaluation mechanisms, and their suitability for the trainees' levels.

- Training programs related to behavioral competencies are adopted according to the general framework of behavioral competencies in the federal government. Training programs unrelated to behavioral competencies are dealt with separately other than what has been specified in this manual.
- Training providers shall inform the Federal Authority for Government Human Resources of any change in the training programs approved by this manual and related to behavioral competencies.

Phase V: Updating the Individual Development Plan

After selecting the training programs, the employee, in cooperation with his direct manager, shall update the individual development plan, as stated in the training and development system for the employees of the federal government in order to include the approved training programs. The plan includes the competencies to be developed in the employee to fill the performance gap appeared when applying the performance management system, indicating the necessary skills to empower these competencies and programs that the employee shall develop, provided that human resources shall be informed of these updates to give its opinion, if necessary.

Third Chapter

Application of the Manual at the level of Training Providers

Training providers are an important and necessary part of the training methodology based on behavioral competencies. The Federal Authority for Government Human Resources has selected the best service providers in the State (who have met the standards and requirements of the Authority) to enrich knowledge and develop competencies at the federal government level, supporting and finding better clarification for training programs based on the behavioral competencies. The Authority has developed the so-called "training matrix for the development of behavioral competencies". This matrix includes the behavioral competencies identified in the framework approved by the federal government and the proposed training programs to form an input to develop those competencies (the matrix is attached to this manual). Therefore, they must take specific steps to comply with the procedures of the Authority in this regard so as to be able to apply this manual effectively. Accordingly, their responsibility is to provide relevant programs that have an impact on the development of works. To achieve this, they must achieve several steps, including:

- ❖ Registration in Maaref System
- ❖ Identifying the general framework of behavioral competencies
- ❖ Identifying Training Programs
- ❖ Approving Training Programs
- ❖ Implementing Training Programs
- ❖ Evaluating Training Programs
- ❖ Measuring Training Impact

1. Registration in Maaref System: In order for the service provider to carry out training programs, they must first be licensed according to the standards of the concerned authorities in the UAE and then fulfill the requirements and criteria of the Federal Authority for Government Human Resources to be registered in Maaref System as a preferred training provider approved within Maaref Initiative, which ranks training providers based on specific steps that described in details on Maaref website, at www.maaref.gov.ae.

2. General Framework of Behavioral Competencies in the Federal Government: After registering and obtaining official approval as a preferred training partner, the service provider should read and understand the definition of the General Framework of Behavioral Competencies in the Federal Government of the UAE. The service provider classifies his/her training programs submitted to the Federal Government based on this framework. Therefore, they must read and understand the behavioral competencies and understand their own levels to be able to propose programs that benefit the employees and lead to improve the performance in the federal government.

3. Identifying Training Programs: After reviewing the general framework of behavioral competencies in the federal government of the United Arab Emirates, the service provider will communicate with the officials in Maaref and review the training needs

of the target category, the appropriate training programs, provided that initial proposals for each training program that includes the following shall be developed:

- The scope and address of the training program.
- Program language.
- The behavioral objectives of the program and its themes.
- Competency / competencies to be developed in the program (based on the general framework of behavioral competencies).
- Skill level (based on the general framework of behavioral competencies).
- Proposed duration and dates of programs.
- Places of courses.
- Admission conditions for the program, if any.
- The evaluation mechanism of the trainees, and the evaluation methods of the program.
- Curriculum vitae of the trainers, and data of training program coordinator.

After the submission of the program proposals, including all the above-mentioned information, Maaref teamwork reviews and gives preliminary approval to the content complies with a number of the criteria set by the Authority, including:

- Training programs are depended on the accredited service providers in Maaref only.
- Training programs that contain all the required data are approved. If the service provider cannot deliver any data, the application will not be considered.
- Approved programs are that rely on programs associated to behavioral skills according to the general framework of behavioral competencies in the federal government of the United Arab Emirates. Training programs that include the development of specialized competencies shall not be deemed included in the training matrix of behavioral competencies.
- Training providers should inform the Federal Authority for Government Human Resources of any change in the approved training programs, in terms of changing the name or objectives or if they are dropped from the provider's plans.

4. Approval of programs by the National Qualifications Authority: After the National Qualifications Authority reviewed the specific programs by the training providers, these providers shall review the National Qualifications Authority to approve the training programs identified by the Authority. If these approvals are obtained, the training providers shall inform the concerned persons in Maaref so that these programs become effective.

5. Declaring the implementation of specific training programs according to the needs of the Federal Authorities: After the completion of the previous step involving the adoption of training programs, the Federal Authority for Government Human Resources shall announce the specific training programs agreed upon with the training providers, after which the federal government agencies shall communicate with the

training program coordinators with the training providers and to directly register these programs.

6. Evaluating Training Programs Provided: In coordination with the Federal Authority for Government Human Resources, the training providers will conduct, at the completion of the training programs, an evaluation to these programs in order to measure the extent of their commitment to what has been indicated in the third step and that they meet the criteria and objectives of the training programs matrix for behavioral competencies as well as its predefined objectives.

7. Measuring the Impact of Training: Training providers shall, in cooperation with the Federal Authorities and in coordination with The Federal Authority for Government Human Resources, carry out the process of measuring the training impact to ensure that the training achieves its objectives and that the target employees are met the required level of skill to develop their behavioral skills, and that it reflected on their functional performance.

Annexes

Training Programs Matrix Related to Behavioral Competencies

Competencies defined in the general framework of behavioral competencies in the federal government are linked to the training process and training programs that suit each behavioral efficiency according to the job level and rank of the seven levels of performance adopted in the framework. As the framework aims to give the direct managers and the employees a holistic understanding of the concept of competencies, it was necessary to clarify the relevance of these competencies to the training processes, as explained in the training manual based on behavioral competencies.

In order to facilitate the targeted and users of the general framework of behavioral competencies, this annex, which outlines a set of training programs suit to the requirements of achieving specific behavioral competencies according to the seven specific performance levels, has been added. This annex explains proposals for training programs that do not qualify to be mandatory to the Federal Authority, but it may reach the specific performance levels in the general framework of the behavioral competencies of federal government employees. Each program has a description of the objectives of these training programs, including the three learning levels in training (information, skills and behavioral directions).

The Federal Authorities have the option either to add or choose other programs to these proposed programs based on the specific training needs of its employees according to the training plans, to be guided by clear institutional criteria in selecting the best providers to ensure the achievement of the objectives of these programs and workshops.

For the convergence of functional levels and the nature of the overall tasks of some levels of performance, the seven performance levels were set according to the general framework of behavioral competencies in three groups. The first group includes performance levels PL7 + PL6 + PL5. The functions of this group fall within the range of leadership functions, Group 2 includes performance levels PL3 + PL4, and the third group includes PL1 + PL2 performance levels. Each group included a number of proposed training programs that take into consideration the general nature of the tasks included in their performance levels and took into account the differences in the nature of the work of the Federal Authorities and the functions of their tasks.

Training Programs Groups for Performance Levels

Group I: PL7 + PL6 + PL5

Group II: PL4 + PL3

Group III: PL2 + PL1

The proposed programs in the three groups took into account the diversity and comprehensiveness of their proposed training topics and training objectives for several purposes:

- Providing a reference document for training and development units in the Federal Authorities, including a description of training programs that can be proposed to the employees.
- The diversity of programs to include most of the functional titles within the performance levels within the single group.
- Facilitating the tasks of the training employees to propose training programs for employees or negotiate with training providers on the targeted training.

It should be noted that these proposed training programs serve only the competencies contained in the general framework of the behavioral competencies of federal government employees.

Group I:

PL7

Deputy Undersecretary + Assistant Undersecretary

PL6

Special grades A + B

PL5

First and second grades

The functions of this group according to the classification of the general framework of behavioral competencies in the federal government include functions that are similar in terms of functional level. The group has two categories, are:

- Leading Positions.
- Senior Positions.

They are leading, whose work is related to decision-making, policy-making, strategy-building, and leadership of the process of change. Therefore, the training programs required for these two categories are therefore homogeneous in nature and content. As previously indicated, the proposed programs for these positions are indicative and can be added or modified depending on the nature of the job holder or the Federal Authority.

Behavioral competence	Proposed training programs	Content of the proposed training programs	Period
	Future Strategies	<ul style="list-style-type: none">• Identifying the four basic approaches needed to build future institutional strategies.• First dimension: exerting skills to identify the need for digital technology, smart applications and institutional adoption.• Second dimension: exercising the skills of analyzing the importance of involving customers in building strategy and its impact on the future of the institution.• Third dimension: exercising the skills of defining the role of transparency and governance in building future strategies and involving partners (employees, customers, institutions).• Fourth dimension: Acquiring skills to develop innovative and creative initiatives to build institutional strategies.	one to three training days
